## Profile:

Passionate and enthusiastic programmer with a special interest in engine, graphic and animation programming as well as general purposes GPU techniques. Aiming to bring originality, proactivity and hard work to the team I work with by contributing with creative solutions to possible problems that may arise during the development of projects, always with a smile and making the work the most pleasant way for the team.

I am currently working as Remote Unity Developer at Psious, I have previously developed a game in Unreal Engine 4 aimed at PS4 and PC. In addition to this game, I have developed a GPU accelerated animation library, both while studying my final year at Sheffield Hallam University. Furthermore, last year a team of students and I published an Unreal Engine 4 first-person melee game called Avalo Legends.

## Skills:

<b>Languages:</b>	English (Fluent), Spanish (Native)
<b>Programming Languages:</b>	C++, C, C#, HLSL, GLSL, ARM Assembly
<b>3D Computer Graphics:</b>	DirectX 11, OpenGL 3.X
<b>Game Engines:</b>	Unreal Engine 4 (published game), Unity (professional experience)
<b>Other Technical Skills:</b>	Visual Studio, RenderDoc, Git, Perforce, Game Design, FMOD Studio

## Education:

- BSc (First Class Honours 1) Computer Science for Games in Sheffield Hallam University 2019-2020 (Final year only. Course continued from ESAT, a full degree is given upon its completion).
- BTEC Level 5 HND in Computing and System Development in ESAT (Escuela Superior de Arte y Tecnología) 2016-2019.

## Relevant Experience:

### Remote Unity Developer, Psious

June 2020 - Present

During my period of work at **Psious**, I have participated in complete software development and software maintenance cycles. Since Psious is a start-up with a small technical team I have been heavily involved in these processes. I have mainly played the role of Gameplay and Backend Engineer.

These are the main tasks I have developed during my stay in the company:

- Port all the software to a newer engine version.
- Refactor software to improve performance and maintainability.
- Design and Implementation of new features and systems.
- Collaborate with leads in development of estimates and schedules.
- Organize and assign tasks to new partners.

### Game Programmer, Spooky Waffle

October 2018 - July 2019

I worked in the game Avalo Legends forming part of a student studio inside the university. Avalo Legends is a first-person melee local multiplayer game made in Unreal Engine 4.

It is published on [Steam](#). These are the main contributions to game development:

- Full implementation of the multiplayer system (split-screen system and input management).
- Design of class hierarchy and component system by character.
- Implementation of some characters' ability.
- Implementation of some post-processing visual effects (e.g. outline of character).
- Capture the flag game mode (design and implementation).
- Integration of FMOD plugin for the implementation of the game's audio.
- Full game audio system implementation and integration.
